

**TCC VET**

Toward a Continuous Cycle of digital literacy learning for VET teachers

# Testimonials

## OneNote

Co-funded by the  
Erasmus+ Programme  
of the European Union

**Name of the teacher:**

Karina Hasselby

**Brief CV:**

Teacher and process optimization practitioner at the Technical Education Copenhagen in Denmark. Besides teaching (what she loves very much), as a very important part of her work, she runs processes in the organisation, department, school and in teaching.

**- How often do you use the tool?**

Our students use this every day, you can use OneNote easily with office package and with google.

**- What tip would you give to other teachers regarding this tool?**

This is a tool primarily for students, but once in a while you need to look with them and keep an eye on them. You have to check sometimes and sometimes have to force them to do something, although be aware of not force them too much. It could have an opposite effect and you'll lose them. OneNote is used through all education levels in my school, so students are mandatory to use it. This is a tool everyone can use – easy accessible.

**- For what purpose?**

I use OneNote for reflection. How far are you today, what progress did I make? You can use it as a journal/logbook. You can show the progress you have made, but also those of the students. Metacognition; you've learned something, and learned about the way you did it – Self reflection.

Toward a Continuous Cycle of digital literacy learning for VET teachers

## Name of the teacher:

Adıgüzel AKAN

## Brief CV:

He is working at vocational high school more than 20 years and worked as a teacher and as manager assistant. He is an expert at metal technology and especially designing it. Design, develop and find solutions about mechanics is his working area for many years.

## - How often do you use the tool?

Twice in a month sometimes more.

## - What tip would you give to other teachers regarding this tool?

To use One Note in the class maybe will not be so funny at the moment but for sure will be useful and take their attention. Of course teachers will lead to the students to use it and make it interesting.

## - For what purpose?

Sometimes I want to take notes and take some pictures of the products at the moment. I would like to remember them and need to take notes. This is also interesting for students to use digital tool during the lectures and take their attention. Our lectures are based on using drawing tools and do to we have to use technology. All of them use smart phones and why not using them for lectures.
